## **Reasons for Allowance**

The following is an examiner's statement of reasons for allowance: none of the prior art of record teaches or suggests a method of forge welding tubulars as set forth in independent claim 1 with the limitations associated with the number of circumferentially spaced cameras coupled to a pyrometric and position monitoring system. None of the prior art of record teaches or suggests a tubular string joined by a particular method as in independent claim 13. The tubular string of claim 13 is considered to be structurally distinct from a conventional tubular string because the claim 13 tubular sting is produced by the claimed steps that include the use of a reducing shield gas that will produce a metallurgical bond with minimal irregularities combined with the heating and forging steps that will produce a weld of minimal deformation. None of the prior art of record teaches or suggests the system of independent claim 19 that includes a plurality of circumferentially spaced cameras and includes the pyrometric and position monitoring system that adjusts the position of tubular ends as set forth in the claim. The dependent claims are allowable at least because they depend from the allowed independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 1725

Any inquiry concerning this communication should be directed to Clifford C Shaw at telephone number 571-272-1182. The examiner can normally be reached on Monday through Friday of the first week of the pay period and on Tuesday through Friday of the second week of the pay period.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Patrick J. Ryan, can be reached at 571-272-1292. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
